Installation instructions

Installing the update on the console:

- FTP or import (from CD or USB) the vista-update.tgz file to the /vista/update directory.
- Go to the Vista menu and click on "Check for Updates".
- Choose "From FTP location".
- Select the vista-update.tgz file.
- The console will shut down once the update is complete.

Installing the PC offline editor:

- Back up existing data directory contents (e.g. show files, standalone fixture files, audio and effects files).
- Copy the vista-update.msi file to your hard drive.
- Double click on the vista-update.msi file to automatically install the offline editor.
- *Note that you no longer need to uninstall previous installs of Vista PC.*

Installing the Mac offline editor:

- Back up existing data directory contents (e.g. show files, standalone fixture files, audio and effects files).
- Copy the vista-update.dmg file to your hard drive.
- Extract the vista-update.dmg file to install the offline editor.
- *Note that HASP drivers have to be installed separately at this stage.*
